

Ferrari Stamoid Care and Maintenance

Cleaning

Stamoid should be cleaned of any dirt build-up at regular intervals. The supplier recommends applying IMAR Stamoid Marine Vinyl Cleaner or a mild, lukewarm soap solution if IMAR Cleaner is not available, such as liquid dishwashing soap, with a soft brush or sponge. Let the soap stand for a short period of time but do not allow soap to dry. The fabric must then be carefully rinsed with clear clean water in order to remove any remaining soap residue. Allow the vinyl to **dry thoroughly**, then reuse and/or store. It is recommended that after cleaning an application of IMAR Stamoid Marine Vinyl Protective Cream or Spray be added to the surface of the Stamoid product.

NOTE: The use of abrasive detergents and/or substances containing solvents or gasoline will damage the vinyl coating and/or fabric. **DO NOT WASH THIS MATERIAL IN A WASHING MACHINE OR DRY IN A DRYER.**
